SKILLS

JavaScript, React, Redux, HTML, CSS, Node.js, Express.js, SQL, PostgreSQL, Git, Heroku, Sequelize, SQLAlchemy, Flask

PROJECTS

MeetUp Clone (ReactJS, Node.js, Express.js, Sequelize, PostgreSQL)   live | github
A clone of meetup.com that allows people to find and post groups and events in their area
- Wrote customized front-end validators on forms ensuring clear input requirements while minimizing invalid submission requests thus increasing performance.
- Implemented Sequelize ORM over a PostgreSQL database to manage complex relations and exchanges, speeding up development time.
- Developed a solo full stack application within two weeks in order to meet deadlines.

OpenTable Clone (ReactJS, Redux, Flask, SQLAlchemy, PostgreSQL)   live | github
A clone of opentable.com that allows users to reserve, review, and favorite nearby restaurants
- Utilized UI Redux state and CSS positioning to create responsive, interchangeable modal components.
- Co-authored documentation and application planning with other engineers prior to coding in order to maximize codebase synergy and ensure development time was used efficiently.
- Integrated WTForms into the controller layer in order to clean form submission data using custom validators, ensuring clean database transactions.

Discord Clone (ReactJS, Redux, Flask, SQLAlchemy, PostgreSQL)   live | github
A Discord clone that allows users to use servers and user-to-user chats to share messages and media in real time
- Achieved seamless integrated live messaging by integrating the SocketIO library with the Flask app.
- Combined the utility of Redux global state management and React-Router in order to allow complex and fluid UI navigation on a single page application.
- Created general, modular components by employing global state sharing and prop threading of callback functions and data from more specific parent components.

EXPERIENCE

Delivery Driver
Goodfellas Drafthouse   Jun 2017 - Aug 2022
- Satisfied over 200 customers a month by delivering food and alcoholic beverages in a professional manner.
- Organized optimal routes daily for company drivers during peak business hours to ensure food was delivered in a timely manner.
- Assisted with customer service, phone calls, and organized orders.

Seasonal Driver Helper
UPS   Nov 2018 - Jan 2019
- Provided world-class customer service to all customers with a positive attitude.
- Exhibited strong communication, interpersonal skills, punctuality and excellent teamwork.
- Delivered over 1000 packages weekly to over 100+ stops a day during the peak holiday season.

Municipal Laborer
Ohio Township, Parks and Road Department   Jun 2016 - August 2018
- Executed over 5 monthly road service and community improvement projects across the township.
- Performed mulching, weeding, grass cutting, trail cleanup, and other jobs to maintain the 80+ acre community park.
- Followed landscape plans in installation and removal of landscape features.

EDUCATION

Web Development - App Academy   Sept 2021 - Aug 2022

Immersive software development course with a focus on full-stack web development, which entailed 1000+ hours of coding.

Undergraduate Studies - Pennsylvania State University   Aug 2018 - May 2021

Completed general classes within the engineering discipline. Withdrew in good academic standing.

High School Diploma - Avonworth High School   Aug 2013 - May 2017

Graduated as a top 10 student out of a class of 200 with a 4.34 GPA.
